## Overview

Collage HR is an all-in-one HR and benefits administration platform specifically built for Canadian businesses. Collage helps you manage everyday HR tasks online – like approving vacation requests, coordinating new hire training, conducting performance reviews, posting open jobs, managing your new hire pipeline and more. No matter how big or small your team is, Collage helps deliver a more enjoyable and more compliant employee experience **with less work**.

Collage HR's Payroll Sync\* includes the ability for your employees to fill out their payroll information (SIN, bank account, federal and provincial TD1 forms) and the system syncs directly with [major payroll software vendors](#). This means that you can simply use Collage to onboard new hires or update employee information like salaries and those updates will automatically flow to your payroll software. This eliminates the need for manual double-entry and helps ensure that your payroll will be correct and compliant. Additionally, your employees will each have their own self-serve login where they can view their personal information and keep it up to date at any time, from anywhere, and from any device.
